

More good news with regard to reported path faults 12/11/08 by John & Liz re the
bridleway & footpath at Slack House.

The paths are now open to be walked. There are some minor issues that still
need improving & will be done in the near future....

The upgrowth need cutting on the bridleway & some debris on the footpath in
front of the gate leading from the farmyard to the field, but generally both routes
can be walked.

Please thank them on my behalf for reporting the obstructions (that had clearly
been there for many years).
