

The following information was submitted on July 17, 2008 @ 12:56 pm:

Grid Square: SD9826

Date Submitted: 17/07/2008

Reported Started: from 08/06/2008

Report Finished: To 08/06/2008

Overall Assessment: As before, many footpaths in this grid are well defined and heavily used. This means that rights of way issues do not generally exist but there can be litter problems. Again several bin liners of rubbish were collected with the main culprit being agricultural waste (plastic sheeting).

Comparison With Information In Previous Report: Similar to the last report with the same dangerous footpath tunnel (see below).

Maintenance Problems Or Difficulties To Formally Report To Calderdale MBC: As before at grid reference 989266, one footpath goes through a tunnel under another. The tunnel is in a state of collapse with some stones hanging down. This is a known problem but no action has been taken.

Other Particular Problems Or Difficulties Encountered: No other problems encountered.

Other Comments, If Any: No other comments.
